

The First Lead-Free, Energy Star Qualified, and Ozone Safe Air Purifier Ever Made Set to Debut - the AirMD from Alen Corporation

Texas-based Alen Corporation has created an entirely new category for home and office air purification systems. The AirMD, the company's newest air purification product, is certified lead-free as well as Energy Star qualified by both the U.S. Environmental Protection Agency and the U.S. Department of Energy. It delivers the cleanest air possible in an ultra-modern and stylish form. It will be the first and only "green" air purifier on the U.S. market that is completely lead-free.

Austin, Texas - February 5, 2008 - Consumers will soon be enjoying the cleanest air possible without sacrificing style, the environment - or their health. Alen Corporation announced today their newest product called the "AirMD" is completely lead-free, Energy Star qualified by both the U.S. Environmental Protection Agency and the U.S. Department of Energy, and ozone safe. The first of its kind, backed by the industry's best lifetime warranty, the four-speed AirMD marries modern décor-enhancing design with an impressive HEPA filtration system, UV lamp set to last 3 to 5 years, ionizer, and 24-hour programmable timer. Eco-conscious individuals suffering from the agony of cigarette smoke, pet dander, allergies, cooking odors, dust, pollen, dust, and bacteria now have a powerful yet compact air cleaning solution.

"We are delighted to be offering the first lead-free air purifier in the U.S. that is Energy Star qualified," said Peter Mann, CEO of Alen Corporation. "Lead is a highly toxic metal that makes children, adults and pets extremely sick - and a recent study even links early exposure to lead to Alzheimer's disease. Alen Corporation seeks to change this fact and set the new standard in air purification. In addition, Energy Star rated products - such as our new AirMD - can save families and businesses about a third on their energy bill with similar savings of greenhouse gas emissions, without sacrificing features, style or comfort."

The AirMD weighs 17 lbs., is 8"W x 11"D x 28"H, and has power consumption of 55 watts. It features a bold new look of a translucent outer core with two color choices for the inner core - bamboo green or white. It is best used in areas up to 400 sq. ft. such as bedrooms, nursery, kitchens, bathrooms, and offices. It will be available July 2008 and the retail price is \$499 U.S.
